

Operation NEXT: A New Water Supply Initiative

Environmental Review with Notice of Preparation Scoping Period

LADWP's Operation NEXT in partnership with LA Sanitation and Environment's (LASAN) Hyperion 2035 (collectively, the Program) is undergoing environmental review with a Notice of Preparation (NOP) in accordance with the California Environmental Quality Act (CEQA). The aim of the Program is to improve the overall water supply resiliency and reliability for Los Angeles by recycling 100% of the City's available treated wastewater.

The purpose of this NOP scoping period is to obtain input from the public and agencies on the environmental issues to be evaluated in the Program Environmental Impact Report. Environmental review will be conducted at the programmatic level, and as the City moves forward with more detailed design information for the various components of the Program, future project-specific CEQA review may be required.

The Virtual NOP Scoping Period is March 15 – April 14, 2021.

Review the Virtual NOP materials at www.ladwp.com/operationnext/ceqa and submit your comments.
